

## A hands on introduction to Surgical Stapling Sydney May 2022

The use of Surgical Staplers can significantly reduce surgery time, and when used properly are strong, reliable and dependable. [Surgical Staplers](#) help minimise tissue handling and exposure adhering to Halsted's principles.

Join Small Animal Specialist Surgeon Dr Alen Lai as he introduces delegates to the use of Surgical Staplers in practice.

### Key topics

The focus of the course will primarily be on gastrointestinal indications including intestinal anastomosis, typhlectomy and gastrectomy. Also covered, the use of [Linear Staplers](#) for lobectomies and the use of [Ligature Clips](#).

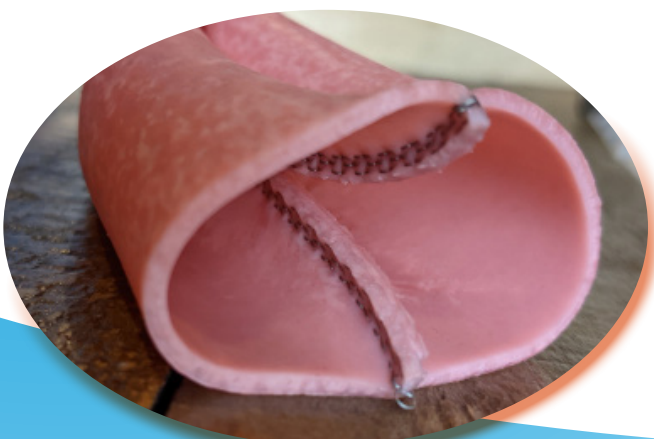

- Decision making
- Proper technique
- Stapling equipment
- Case examples

A hands-on lab will follow in which the participants will have the opportunity to perform a simulated functional end-to-end stapled intestinal anastomosis using [Linear Cutter Surgical Staplers](#) on tissue models.

The course is designed for Veterinarians that are experienced at surgery and wish to expand their surgical repertoire.
